

CUSTOM SERVICES FOR PERSONAL CARE

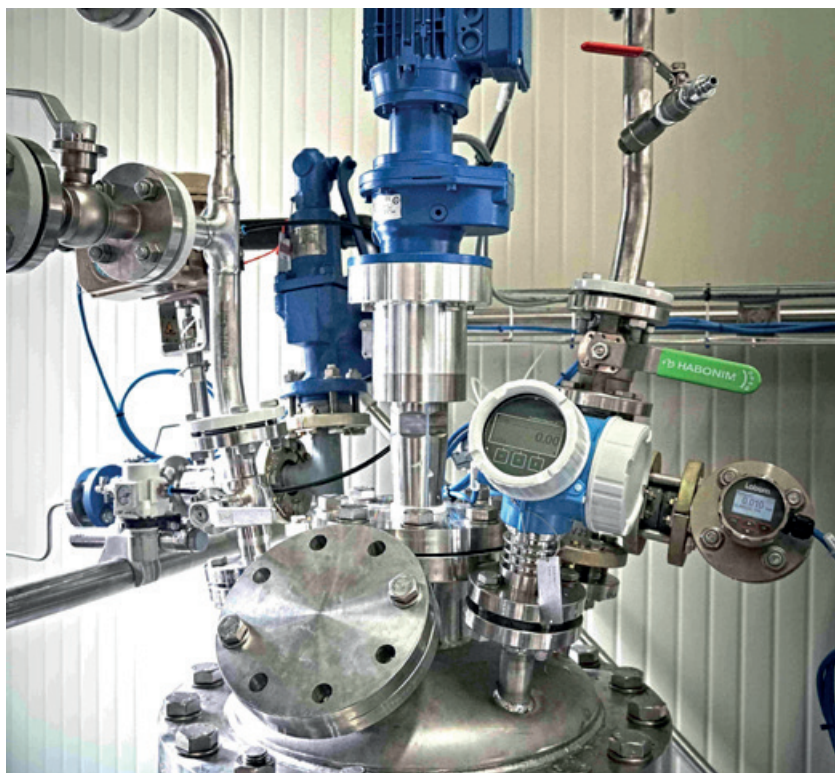

LET'S GROW TOGETHER

TECHNOLOGIES WE MASTER

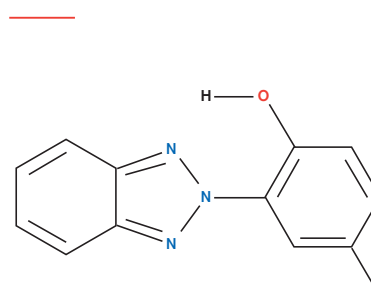

Valsynthese uses a broad range of classical chemical reactions:

- **Hydrogenation**
- **Nitration**

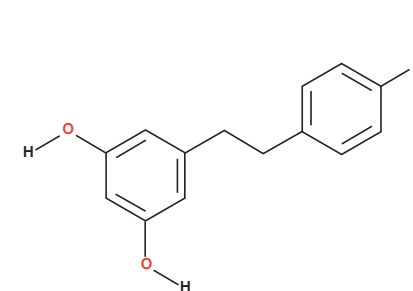

- Acylation
- Amination
- Azidation
- Bromination
- Carboxylation
- Chlorosulfonation
- Chlorination
- Dehalogenation
- Diazotisation
- Diels-Alder
- Etherification
- Friedel-Crafts
- Grignard
- Heterocyclic Synthesis
- Oxidation
- Phosgenation
- Reduction
- Sulfonation

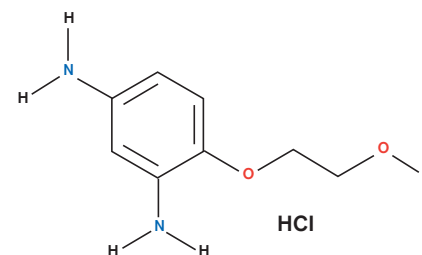

POTENTIAL FAMILIES OF PRODUCTS

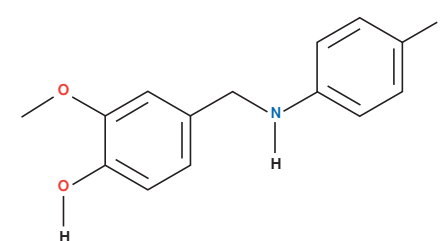

UV-stabilizers

Active ingredients

Oxidative Hair Dyes

Preservative & Boosters

OUR CERTIFICATIONS

ecovadis

We are registered by Agroscope.

EXPERTISES OF VALSYNTHESE

- Flexibility and versatility
- Up-to-date Know-how and high levels of skills
- Swiss quality and reliability
